

# **ULISSE CAMERA**

## **POSITIONING UNIT WITH INTEGRATED CAMERA**

- Unit comprehensive of Sony day/night camera in outdoor enclosure, P&T head and telemetry receiver
- 36x optical zoom capability
- Dynamic video masking of different areas
- Smart lens control
- High-Performance Digital Signal Processing (DSP)
- Auto ICR (IR cut-filter removal)
- Available version with encoders

ULISSE integrates a high performance P&T head with a day/night Sony camera, an outdoor housing, and a telemetry receiver\*. It reduces the need for several devices and combines superb picture quality with high-performance positioning for demanding security and monitoring applications.

The Sony block camera combines an incredibly high 36x optical zoom and Auto ICR capability with a 1/4 type EXView HAD CCD for high sensitivity in low light environments. The camera features a wide field of view of 57,8° and a 1,7° telephoto capability.

When used in combination with its 12x digital zoom, the total zoom capable is up to 432x. Users can zoom in on small or distant objects with exceptional clarity.

Furthermore, it is possible to proportionally control the zoom so the pan and tilt continually increase or decrease speed in proportion to the distance of the zoom.

Thanks to the ULISSE's integrated block camera, dynamic video masking of different areas is possible. Both the size and the position of the masked areas will adjust proportionally in relation to the zoom and pan/tilt. This is an important feature when ULISSE is used in wide-area monitoring applications.

NTEGRATED POSITIONING UNITS

 $\infty$ 

An easy on screen set-up of a maximum of 24 masking areas to any of 160 horizontal and 120 vertical masking blocks with up to eight block positions can be selected.

The camera incorporates a smart lens control technology that monitors lens focus position during zoom and automatically compensates for mechanical misalignments which may occur over long periods of continuous usage. Furthemore, with the new slow AE response function, the camera can adapt to abrupt changes in light while capturing fine image details.

For optimised sensitivity in both day and night-time shooting applications, the camera incorporates an Auto ICR function, which is effective in a variety of lighting conditions. With a set level of darkness, the "IR Cut Filter" is disabled automatically or by alarm contact (ICR ON); the infrared sensitivity is increased. Some ULISSE versions are supplied with brackets for the installation of two infrared illuminators allowing for excellent night surveillance.

<sup>\*</sup> for full specs on the positioning unit please check "ULISSE, positioning unit" data sheet.

## GENERAL

GENERAL
For missing specs refer to "ULISSE" data sheet, standard version
High performance digital signal processing (DSP)
36x optical zoom capability
Enhanced spherical Privacy zone masking
Smart Lens Control
Auto ICR mode
Integrated camera
Image Sensor: 1/4 type EXview HAD CCD
Number of Effective Pixels: Approx. 440.000 pixels
Min. night Illumination (ICR ON): 0,01 Lux / 1/4sec. (NTSC), 1/3sec. (PAL) tipical
Min. day Illumination (ICR OFF): 0,1 Lux / 1/4sec. (NTSC), 1/3sec. (PAL) tipical
Slow AE response function
S/N Ratio: More than 50dB
Electronic Shutter: 1/4 to 1/10,000 Sec 20 steps
AE Control: Auto, Manual, Priority mode, Bright, EV compensation, Backlight compensation
Back Light Compensation: On/Off
Upgraded 3-D "Spherical Privacy Zone Masking
Privacy Zone Masking: On/Off (24 positions)

8 Maximum number of masking blocks to be displayed

Resolution of masking blocks: 160x120 HxV

Max 14 colours to be preset for masking

Focusing System: Auto (Sensitivity: Normal, Low), One-Push AF, Manual, Zoom Trigger AF

Video Output: VBS: 1.0Vpp (sync negative)
