

- Small size
- Microprocessor controlled
- RS485 communication up to 1200m

MICRODEC485 is a mini digital control receiver managed by a microprocessor for the remote control of a pan and tilt head and motor-driven lenses.

Designed to be installed inside camera housings, it ensures easier installation by reducing the number of connections and equipment (such as external boxes).

All functions are ensured by the DCT, DCJ, DCTEL and DCIR keyboards and SM matrix range.

The connection to the control unit is RS485 (connection distance up to 1200m by twisted pair cable).

Up to 32 receivers can be addressed. The feed voltage is 24V AC.

The MICRODEC485 can control Pan and Tilt heads in 24V AC, 50/60Hz and 12V DC lenses with polarity inversion (zoom and focus); it can be installed into HEB and HEG housings.

TELEMETRY DATA MINI RECEIVER

TECHNICAL DATA

GENERAL

8 Functions: UP, DOWN, LEFT, RIGHT, ZOOM TELE, ZOOM WIDE, FOCUS NEAR, FOCUS FAR

32 identification addresses, selectable by dip switch

Direct installation in HEG, HEB housings

Optoisolated digital logic and power section

2 diagnostic LEDs

Supplied with instruction manual, 1 support plate, 4 spacers, 2 fixing screws

MECHANICAL

Dimensions: 100x60mm (3.9x2.3in)

ELECTRICAL

Power supply: 24V AC, 50/60Hz

Power supplied to the positioning device: 24V AC, 50/60Hz

Power supplied to the lens: 12V AC, 50mA (polarity inversion lenses)

Power consumption: 1W

PROTOCOL

VIDEOTECH (1200, 9600 Baudrate)

COMMUNICATIONS

Serial input RS485

Max Distance 1200m (3937ft) from Matrix Series SM or controller keyboard
